

## Aria Add 1213<sup>®</sup>

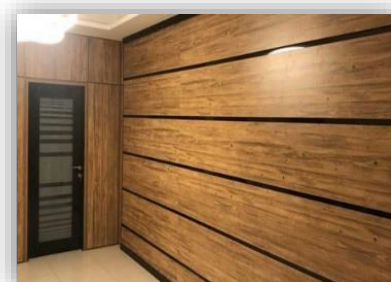

## Impact Modifier of UPVC

### Description

**Aria Add PEG 1213<sup>®</sup>** is a high performance Ethylene base polymer resin. It has been designed to act as a modifier of mechanical properties like tensile and impact strength with good processability in UPVC pipe, wall covering and profiles to aid filler dispersion and obtain a balance of impact resistance and other properties.

### Technical specification

- Raise up the impact properties
- Decrease impact modifier like CPE and Acrylic modifier
- Good processability
- Improve surface gloss of UPVC parts
- No adverse effect on other properties
- No significant change in price by using 0.5-1.5 %.
- Good interaction with other components (fillers, lubricants, ...)

Physical Properties	Value	Method
Appearance	powder	—
Odor	Low	—
Usage level	0.5-1.5 %	—
Density	0.92	—

### Packaging & Storage

**Aria Add PEG 1213** is packed in 25 kg bags. This bag should be stored in a cool and dry place below 50°C, protected from sunlight and tightly closed to avoid contamination.
